SVENSKA HELLINGER INSTITUTET

Systemic Constellations FORUM

June 2-4, 2017 in Stockholm

Masterclass with Guni Baxa

Filling station for constellators

Guni revealed, you revealing yourself

In this masterclass you will not only learn by watching, but also by understanding Guni's concepts, strategies and inner processes while she is working. Sometimes there is just this one little sentence or a moment of understanding the essence of a constellator's work that enables you to make a shift in your work as a facilitator. In this process of revealing the 'hidden' dynamics of Guni's work, you also automatically will be confronted with your own, sometimes subconscious, concepts and inner places from which you operate.

Form

Guni will use cases of participants as point of departure to work. She will explain her strategies via constellations. She will explain her underlying concepts of life, healing and constellations. This will not be lessons of theory in general, but of Guni's theory, and as a mirror: of your own theory. It also will reveal the underlying attitude, the sources from which Guni is working, the power of silence, and where the sources come from: the client, the universe, modern or ancient traditions, Guni herself...

The questions of participants are an important contribution to this masterclass, giving priority to questions leading to new insights and revealing underlying concepts and views. Although the necessary skills, forming an important part of the tools for a constellator, will be revealed, this masterclass will not spend much time to practice for the participants. When the energy requires, there will be moments to integrate, possibly with exercises in small groups. But the main part of integration you have to do your own way, your own time.

For whom?

This masterclass is for those who completed a training in facilitating constellations and who are practicing this method themselves. Although the focus will be on family constellations and personal issues, organizational constellators with an interest in personal issues are welcome as well. When you subscribe, please tell us in a few lines about your training(s) and experience in facilitating constellations.

Guni Baxa

Guni is one of the first people who started with constellations after Bert Hellinger. She has seen almost all therapeutic currents pass through from the early sixties on has had extensive experience in many of them. In addition, she has very good teaching skills and her knowledge of applied theory is very strong. With her humor, a warm and clear heart Guni is an inspiring source of wisdom.

Welcome to three exciting and inspiring days!

Charlotte Palmgren
